# Setting TLS for Internet Browser

For secure access to your account, please make sure you have the TLS security protocol set in your Internet browser settings.

For Microsoft Internet Explorer **9** this can be located under:

1. **(Tools) Gears icon**
2. **Internet Options**
3. **Advanced tab**
4. **Scroll down to Security**
5. **Scroll down and check TLS 1.0**

Please note the yellow highlighted setting below which should be checked.

For Microsoft Internet Explorer **8** this can be located under:

1. **Tools**
2. **Internet Options**
3. **Advanced tab**
4. **Scroll down to Security**
5. **Scroll down and check TLS 1.0**

Please note the yellow highlighted setting below which should be checked.

For Mozilla **FireFox** browser this can be located under:

1. **Tools**
2. **Options**
3. **Advanced**
4. **Encryption**

Please note the yellow highlighted setting below which should be checked.

For Google **Chrome** browser this can be located under:

1. **Click Wrench Icon**
2. **Settings**
3. **Select "Under the Hood" Tab**
4. **Click Change proxy settings**
5. **Select "Advanced" Tab**
6. **Scroll down and check TLS 1.0**

Please note the yellow highlighted setting below which should be checked.

Internet Options ? X

| General | Security | Privacy | Content | Connections | Programs | Advanced |
